The Perillon WorkSpace Experience

Perillon provides comprehensive *EHS Compliance and Risk Management* software, connecting hundreds of employees across global enterprises in a variety of industries. We are a leader in *EHS Mobile Apps*, setting a new standard for enterprise efficiency, allowing users to easily capture valuable data with any mobile operating system. Perillon's flexible and simplified solutions help you manage your EHS responsibilities in real-time captured at the asset level, including complex air emissions, energy usage for sustainability reporting. Our intuitive and configurable dashboards enable instant visualization of important information, increasing enterprise transparency and significantly reducing costly risks and liabilities. By replacing spreadsheets and outdated systems with user-friendly solutions, Perillon will save you time and resources to proactively stay ahead of increasing EHS demands. Rather than focus on installing overly complex and custom software, we offer quick, standardized implementation of our system and flexible data output, enabling maximum connectivity throughout your company. Perillon empowers your *need-to-know* employees through efficient information exchange, increasing productivity and progressing your company to become proactive about how it manages against EHS best practices.

The Perillon Advantage

Perillon enables users to capture critical data and activities at the source. Powerful dashboards enable trending and performance analysis immediately to help you make proactive decisions in real-time. *Workflow* sends alerts to users and guides them to take responsible actions, helping you avoid major problems and risks that cause costly downtime and penalties. The Perillon Advantage offers:

- *Intuitive Dashboards* for instant visualization of graphical data and one-click view of underlying information.

- *Mobile Convenience for Everyone* with the platform-agnostic GOpak mobile app – "portable knowledge" for task management, assessments, audits, inspections, corrective actions, incidents, and environmental data capture.

- *Quick Standardized Implementation* and secure integration with your systems.

- *Simple Pricing Model* to provide an affordable solution tailored for your company.
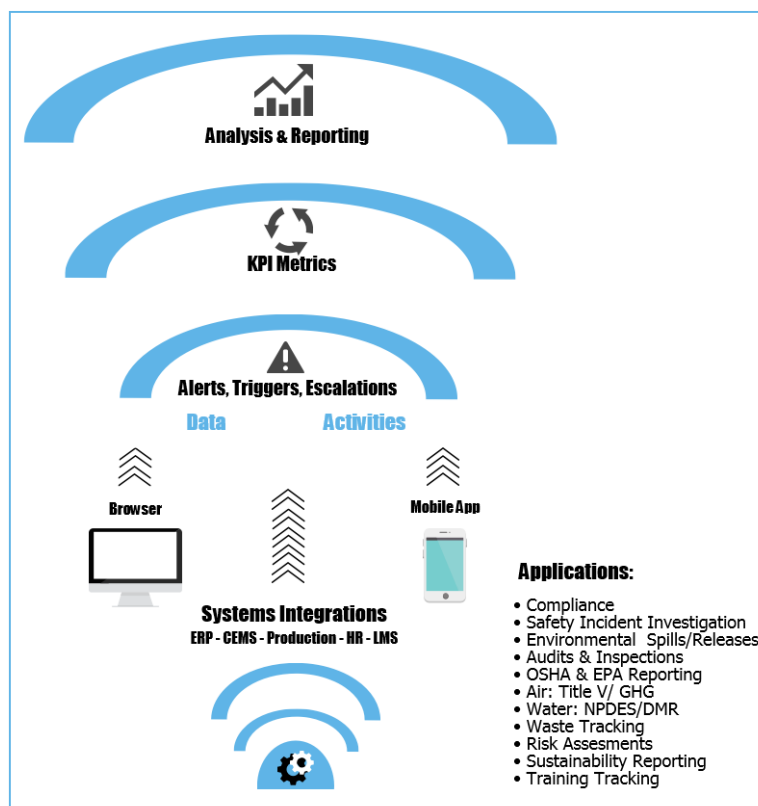

Centralized EHS Performance Management

Centralize your EHS data and activities in one, comprehensive system. Save time, avoid unwanted events, and reduce risk.

Perillon WorkSpace Solution Overview

From data collection to analysis, Perillon WorkSpace streamlines your EHS management to help you make proactive decisions and prevent unwanted events.

Perillon's EHS platform is made up of integrated modules, addressing core business processes, such as air emissions tracking, sustainability metrics, compliance reporting, event management, audit tracking, mobile/handheld inspections, and more. Input data automatically via real-time integration or spreadsheet uploads, or manually by users. Automatic workflows and alerts notify *need-to-know* users when there are issues or permit-driven action items—i.e. report deadlines, incidents, or to-do's. The system also has powerful reporting capabilities and comprehensive dashboards, including both standard and custom report builder modules.

Systems Integrations
ERP - CEMS - Production - HR - LMS

Applications:
- Compliance
- Safety Incident Investigation
- Environmental Spills/Releases
- Audits & Inspections
- OSHA & EPA Reporting
- Air: Title V/ GHG
- Water: NPDES/DMR
- Waste Tracking
- Risk Assesments
- Sustainability Reporting
- Training Tracking

Example EHS Applications

- Air emissions calculations to support Title V and GHG
- Regulatory reporting, i.e. water (DMR); air (emissions inventory, compliance certification); OSHA 300, 301
- ISO 14001 compliance support
- Incident tracking for quality, environmental and safety issues
- Audits—facility, suppliers, safety, risk assessments
- Inspections—visible emissions, equipment maintenance
- Sustainability reporting

Distinct Perillon Qualities

- Intuitive drill-down dashboards, user configurable
- Mobile app with off-line data use and 2-way sync
- Configurable calculation engine for complex air emissions formulas
- Track and manage any type of data (i.e. air, water, waste) by source and measurement parameter
- Data upload tool with data validation
- Real-time secure data integration, behind your firewall

- Task tracking, calendaring with escalation and triggers
- Drag and drop ad hoc reporting and Data Warehouse
- User-configurable drag and drop assessment form builder, with scoring and if/then logic
- Document management with version control
- Single Sign On (SSO) support
- Configurable user entry screens (show/hide fields)
- Employee training status tracking

Affordable Options

The Perillon system features quick and standardized implementations, live within weeks. To learn more about our WorkSpace modules, please contact us at **info@perillon.com** for a free product demonstration.
