

Environmental, Health and Safety Solution Manager/Analyst

Perillon Software is looking for an energetic environmental, health and safety professional with information technology experience. Perillon Software is an innovative, leading provider of environmental, health and safety software-as-a-service solutions. Headquartered in Littleton, Massachusetts, Perillon helps organizations achieve not only regulatory compliance but sustainability. Our solutions are easy to use and easy to own, and we are easy to work with. We are a young, fast paced start up that is making a difference for our customers and the environment.

The successful candidate will help support our software implementation projects as a key member of the professional services delivery team. We are looking for someone who loves to help others. Someone who finds excitement in the challenge of understanding the complex needs of a variety of customers and using creativity to solve them. Who can thrive in a fast paced, fast moving startup software environment. to expand their If you are an EHS professional who is bored with the same old functions and wants to have an impact in a bigger way, this is a job for you. We are a young, fast paced start up that is making a difference for our customers and the environment. Join a company where hard work, creativity and drive are rewarded with the opportunity to make a difference every day, take on a lot of responsibility and share in the success. Primary activities of the EHS Business Analyst/Implementation Specialist position are three-fold:

- Provide onsite business analysis and technical requirements definition (30% of time)
- Provide technical implementation support as defined above (40% of time)
- Provide ongoing customer support including facilitation of specific project deliverables/tasks (30% of time)

The qualified candidate will be a self-starter, have excellent organization and communication skills with demonstrated willingness and desire to be accountable for working technical issues to resolution. The ideal candidate will be a strong team player, have 2+ years EHS experience and professional interests in some or all of the following areas:

- Demonstrated EHS experience, especially in air emissions, permit compliance, greenhouse gas inventory, sustainability reporting
- Experience with business/system analysis and requirements definition
- Training
- Technical writing
- Report development using 3rd party reporting tools (e.g. MS Report Writer, Crystal Reports)

Additional, secondary skills/areas of interest:

- Configuration/deployment of EHS software applications
- Data interfaces with Data historians
- Data warehousing

Travel requirement approximately 30%
