

Quality Assurance Manager

Opportunity

Perillon is looking for a Quality Assurance Manager that is a highly motivated self-starter. We need a team player that is an excellent communicator with a demonstrated professional history in the full lifecycle of bringing web based, enterprise class products to market. The successful candidate will enjoy working with experienced business and technology leadership and alongside some of the industry's best Microsoft Certified .NET professionals. If you want to apply your outstanding experience, put down roots and get ready to work for an entrepreneurial company that is privately funded, growing rapidly and ready to make you the best you can be, read on and contact us. All permanent positions include competitive salary, benefits and equity. Excellent opportunities for advancement.

Candidates should have 5+ years relevant experience in applying software testing methodologies and organizing issue tracking management systems for web-based (hosted) enterprise applications.

Qualifications to Excel

Candidate must have a strong grasp of solid test practices and should have keen debugging and documentation skills and must be comfortable with usage of web-based (hosted) browser-based applications. Formulation and execution of test cases, overseeing regression test activities, and day-to-day coordination with release engineering and development leads are fundamental to the role. This candidate may also serve as the leader for a growing team of QA professionals and must be able to work independently to manage efforts according to deadlines and project milestones. Working knowledge of automated test suites and load/stress utilities is a plus.

Understanding the software development lifecycle and industry "best practices" and standards for SQA operations is also required. Familiarity with Windows Server 2003, MSSQL, and IIS is not required, but is beneficial.

We are seeking full time candidates and offer highly competitive compensation for both contract and full-time employees.
